ABOUT ME

Computer Science student at Zarqa University and graduate of the 42 Amman Common Core, with strong foundations in C, C++ and low-level systems programming and hands-on full-stack experience with TypeScript, NestJS and React. Built Unix systems projects, an HTTP server, and a team full-stack web platform where I served as Project Manager. Highly analytical, detail-oriented, and focused on writing efficient, clean, and reliable code.

TECHNICAL SKILLS

- Languages: C, C++, TypeScript, JavaScript, Python, Java, SQL
- Backend: NestJS, Node.js, REST APIs, TypeORM, Socket.IO, JWT & OAuth 2.0
- Frontend: React, Vite, Tailwind CSS, HTML, CSS, i18n & RTL
- Databases: PostgreSQL, MariaDB/MySQL
- Systems: Processes & Threads, Pipes, Signals, POSIX APIs, Memory Management
- Networking: Sockets, HTTP, WebSockets, Client-Server Architecture
- DevOps & Tools: Docker, Docker Compose, Nginx, Git, GitHub, Linux

---

PROJECTS

Petopia – Pet Adoption System (TypeScript, NestJS, React)

- Project Manager and Full-Stack Developer in a 5-person team building a role-based shelter management platform (ft_transcendence).
- Built the pet catalog with filtering and pagination, and the adoption request workflow (submit, approve, reject).
- Implemented veterinary medical records, vaccination tracking, and low-stock inventory alerts.
- Developed persistent and real-time notifications with Socket.IO, and reports exported to CSV, PDF, and XML.
- Added English, Arabic, and French support with full RTL layout; stack ran on PostgreSQL and Docker over HTTPS.

Minishell (C, Unix)

- Implemented a Unix shell supporting pipes, redirections, environment variables, and built-in commands.
- Managed process creation using fork, execve, and wait.
- Handled signals and error cases according to POSIX standards.

Webserv (C++, HTTP Server)

- Implemented a lightweight HTTP/1.1 server compliant with RFC standards.
- Handled client connections using non-blocking I/O and multiplexing (poll/select).
- Implemented request parsing, response building, and error handling.
- Supported GET, POST, and DELETE methods.
- Designed modular architecture for server, routing, and configuration parsing.

EDUCATION

2023 – 2028 (Expected)

Zarqa University – Bachelor of Computer Science

2024 – 2026

42 Amman – Software Engineering (Common Core Completed)

Project-based peer-to-peer learning

Focus on low-level programming, algorithms, system design, and full-stack web development.
